

CLINICAL CANNABINOID (CBD) THERAPY

Derived from nature, perfected by modern science.

Rigorously Tested

Tested by independent labs to ensure quality and consistency

Non-Detectable THC

Products for optimal results without a "high"

Clinically Proven

Trusted by healthcare professionals and backed by an IRB study

Recommended Initial Dosing:
One 30 mg softgel once daily with food

Corganics Clinical Daily CBD Softgels

Provides a precise serving of CBD in a convenient softgel. Each softgel contains broad-spectrum hemp extract that provides a wide range of cannabinoids utilizing our Advanced Lipid Technology (A.L.T.), increasing product bioavailability and absorption.

Recommended Initial Dosing:
1 ml once daily under tongue.
Hold for 20 sec. and then swallow

Corganics Clinical CBD Drops

Patients receive the potential benefits of our easy-to-use, rapidly absorbed oral CBD drops. Formulated with organic olive oil, these broad-spectrum hemp extract drops contain cannabinoids, terpenes, flavonoids, and other beneficial phytochemicals utilizing our Advanced Lipid Technology (A.L.T.). These natural compounds work together to maximize their potential effect.

Recommended Initial Dosing:
1 full pump applied to affected area as needed to minimize discomfort

Corganics Clinical CBD Cream

Made with a blend of broad-spectrum hemp extract, vitamin E, aloe vera, and other beneficial natural ingredients. This unscented formula is designed to maximize the topical effects of CBD.
